ANDROID APP ON Google Play

FLY12 (MANUAL SETTING)

Time and Date Setting

- Connect Fly12 to a PC/Mac.
- Follow the instructions within the help file to set your time & date stamp which is displayed on your footage.

> **TIP**
> This is an automated procedure when your Fly12 is paired via the smartphone app.

## Forgot your WiFi password?

- Connect Fly12 to a PC/Mac.
- Follow the instructions within the help file to reset your WiFi Password.

MICROSD CARD

Included with your device is a 16GB Class 10 SD card which has been pre Installed. Fly12 supports up to 64 GB Class 10 SD cards.

> **TIP**
> To achieve optimal performance Cycliq recommends you regularly perform a full overwrite of your MicroSD card using SD Formatter - www.sdcard.org/downloads (Free Software download).

MASTER RESET

In the event that a master reset is required, the reset button is located within the small cut out as illustrated. Carefully, using a fine object, depress the reset button gently to perform the reset.

INCIDENT PROTECTION

In the event of an incident, Fly12 is equipped with two safeguards to ensure your important data is not lost.

1 If you are knocked from your bike and Fly12 tilts past 60 degrees for more than 5 seconds, it will record for a further 30 minutes before saving and powering off.
2 If you witness an event that you want to capture and retain when riding, simply press the WiFi button briefly. This will lock the current and previous file and prevent overwriting.
FCC COMPLIANCE STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

IC COMPLIANCE STATEMENT

This device complies with Industry Canada's Licence-exempt RSSs. Operation is subject to the following two conditions:

1 this device may not cause interference, and

2 this device must accept any interference, including interference that may cause undesired operation of the device.

NOTE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.
CAUTION

To maintain compliance with the RF exposure guidelines, place the unit at least 20cm from nearby persons.

WARNING

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions.
LIMITED WARRANTY
